

Oak Sleepers

We are currently working with a great selection of mills who offer Fresh Sawn Oak (*Quercus Robur*) Sleepers. These are all PEFC 100% certified and come in full loads between 460 – 500pcs per full load when ordering 100 x 200 x 2400mm. We are also able to source other sizes and some of our mills can offer mixed sizes on a load. Lead time can range from 2 – 5 weeks depending on mill used and can be longer during peak season.

As well as France, we are also working with mills in Romania. They offer Oak (*Quercus Cerris*) Sleepers in FSC 100% and come in full loads varying from 460pcs – 540pcs, amount loaded can differ depending on how wet the sleepers are at time of loading. Again, with these you can have loads of mixed sizes, general size is 100 x 200 x 2400mm. Lead time for these are quicker and are between 2 – 4 weeks, this too can increase during peak times.
